

Recent Changes to tgi Software

3.890 01/05/2012 Added pay-to-provider address field (for Loop 2010AB) in the Master Provider Screen

This option allows offices who have been precluded from using their pay-to P.O. Box on their EDI claim batches to add that P.O. Box to EDI Loop 2010AB. Only use this feature if you have been instructed by your clearing house or are sure that you need Pay-to-Provider filled.

3.889 01/02/2012 Added "Clone" option on Menu Bar in Master Insurance Company Screen

This option will allow users to quickly and easily create new insurance companies which are replicas of existing companies to be used as secondary variants (for paper only billing) or alternate Insko IDs (used to group patients together or move existing records to a new ID code).
